SUMMARY

Software Engineer experienced in building scalable, reliable backend and distributed systems, optimizing performance, and solving complex engineering problems, with experience developing LLM powered applications that combine retrieval, reasoning, and generation. My interests lie at the intersection of artificial intelligence, machine learning, AI agents, reliable intelligent systems, and distributed computing.

EDUCATION

Master of Computer Science Sept 2021 – Dec 2023
Savitribai Phule Pune University Pune, Maharashtra, India
Relevant Coursework: Distributed Systems, Databases, Machine Learning, Systems, Cyber Security

Bachelor of Computer Science June 2017 – April 2021
Savitribai Phule Pune University Pune, Maharashtra, India
Relevant Coursework: Data Structures, Databases, Software Engineering, Operating Systems, Networks

TECHNICAL PROJECTS AND RESEARCH

Atlas AI Jul 2026 – Aug 2026

Atlas AI is a RAG based AI assistant that lets users upload their own data and ask questions about it in natural language. It retrieves relevant information from the data and generates accurate, context based answers.

XPay Jul 2025 – Dec 2025

Built a secure, distributed payment platform using a microservices and event driven architecture, with idempotent transaction processing, JWT based authentication and authorization, Kafka based communication, and end to end observability, focusing on reliability, scalability, and distributed system design.

PROFESSIONAL EXPERIENCE

Software Engineer Jan 2026 - June 2026
ETP Group *Pune, Maharashtra*

- Designed and developed 15+ REST APIs across Spring Boot microservices, using Apache Kafka for event driven communication and distributed service workflows.
- Investigated and resolved 35+ production issues through root cause analysis, improving reliability and stability across distributed backend services.
- Refactored legacy microservices and resolved 150+ SonarQube issues, improving code quality, maintainability, and consistency across backend services.
- Optimized PostgreSQL queries through indexing and query tuning, reducing API response time by 28% and improving database performance.
- Implemented structured logging and centralized exception handling, improving observability, fault diagnosis, and reliability of backend services.

- Integrated Spring AI and RAG capabilities with MongoDB to build context aware backend services and explore practical applications of LLM based systems.

Software Developer Jan 2025 - June 2025
TechBulls SoftTech Pvt. Ltd. *Pune, Maharashtra*

- Designed and developed 40+ REST APIs with Spring Boot, supporting scalable backend services and distributed application workflows.
- Built Apache Kafka based event driven workflows for asynchronous microservice communication, improving service scalability and reducing coupling between components.
- Deployed microservices on AWS EC2 with Amazon S3, supporting reliable cloud infrastructure and improving application availability.
- Optimized backend performance through SQL query tuning, database indexing, and Redis caching, reducing API response time by 30%.
- Implemented JWT authentication and role based access control across distributed APIs, strengthening security and controlling access to backend services.
- Increased backend test coverage to 92% using JUnit and Mockito, improving software reliability and helping reduce production defects.
- Automated Jenkins CI/CD pipelines for backend services, reducing manual deployment effort and enabling more consistent software releases.
- Refactored backend components and improved service design to increase maintainability, simplify future changes, and improve overall code quality.
- Collaborated with QA, DevOps, and product teams to design, test, and deliver reliable production systems while resolving technical issues throughout development.

Software Developer Intern July 2024 - Dec 2024
TechBulls SoftTech Pvt. Ltd. *Pune, Maharashtra*

- Developed backend features for production applications using Java, Spring Boot, REST APIs, and relational databases.
- Designed and integrated REST APIs with frontend applications, contributing directly to production features and end to end application workflows.
- Implemented database queries, validation, exception handling, and business logic to support reliable backend services.
- Debugged application issues and contributed to testing, code reviews, and production ready feature development within an Agile engineering team.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, JavaScript, TypeScript, SQL
Frameworks & AI: Spring Boot, Spring AI, React.js, LangChain, LangGraph
Databases & Data Systems: PostgreSQL, MySQL, MongoDB, Redis, Apache Kafka
Systems & Cloud: Microservices, REST APIs, Docker, Kubernetes, AWS, Linux/Unix
Software Engineering: Software Design, Design Patterns, JWT/OAuth, JUnit, Mockito, Git, CI/CD

ACHIEVEMENTS

- Solved 226+ LeetCode problems, developing strong algorithmic reasoning and problem solving skills.
